## **RE: Discolouration of water in West Elgin**

### **To: Residents and Visitors of West Elgin**

This letter is to inform you that the water that serves the West Elgin area is safe to drink from a Public Health perspective. Due to recent changes in temperature and the presence of naturally occurring minerals in the water, such as Manganese and Iron, the water has recently been discoloured. Southwestern Public Health has received results informing that the levels of bacteria and the naturally occurring minerals are within the safe limits for drinking water. For bacteria, these levels are 0.0.

If you have any questions, please reach out to Southwestern Public Health at 1-800-922-0096

Sincerely,

Dr. Joyce Lock, MD, MSC, FRCPC  
Medical Officer of Health  
Southwestern Public Health
