Date & Time Collected*: 09-Jun-2025 2:30 pm
Date & Time Received*: 10-Jun-2025 3:19 pm
Date Reported: 11-Jun-2025 3:10 pm
Resample: No

*All time values are EST /EDT.

Associated Public Health Unit: Southwestern Health Unit**Beach:** PORT GLASGOW**Laboratory Results**

Barcode ID	Date Analyzed	<i>E. coli</i> (CFU/100 mL)	Sample Comments
012729325	10-Jun-2025	110	
012729428	10-Jun-2025	110	
012729551	10-Jun-2025	200	
012729532	10-Jun-2025	90	
012729464	10-Jun-2025	90	

Geometric Mean: 114**Authorized by:** Chief, Medical Microbiology or Designate

All samples were received in good condition unless otherwise stated under comments.

The geometric mean was calculated using the formula in the Ministry of Health and Long-Term Care Operational Approaches for Recreational Water Guideline:

$$\text{Geometric Mean} = ((X_1) \cdot (X_2) \cdot (X_3) \dots (X_n))^{1/n}$$

where (X_1) , (X_2) , etc. are individual data points and n is the total number of data points used in the calculations.

A value of 10 is used in the calculation for results reported as <10 cfu/100 mL and a value of 1000 is used in the calculation for results reported as $>1.0E3$ cfu/100 mL. Cancelled samples will not be included in calculation of the geometric mean. If additional samples were submitted for this beach, the submitter must use another method to determine the correct geometric mean for that sampling session.

Exponential values are reported as "En" where "n" is the exponent (e.g. E3 is $\times 10^3$).

Test Method: Membrane filtration (modified from the American Society for Microbiology's Bacteriological Examination of Waters: Membrane Filtration Protocol, current edition). The results apply to the sample(s) as received and only relate to these sample(s) tested.
